Carrer Objective

A Frontend and web development enthusiast with experience in building responsive and user-focused web applications using HTML, CSS, React.js, JavaScript, and modern UI practices. Passionate about creating intuitive digital experiences and continuously improving design and development skills through projects, hackathons, and real-world collaboration.

Skills

Programming: C, C++, Python, Java

Frontend Engineering: HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Responsive Design

Backend Engineering: API Design, Middleware, Authentication (JWT)

Databases: MySQL, MongoDB

Web Fundamentals: HTTP/HTTPS, JSON, REST Architecture

Deployment: Vercel, Render, GitHub Pages.

AI Integration: LLM Integration, LangChain, RAG Pipelines

Tools: Git, GitHub (version control), VS Code, IntelliJ, Android Studio

Internship and Projects

Full Stack Developer Intern (MERN) , NovaNectar Services

21 May - 5July,2025

- Designed and developed responsive web interfaces using React.js and modern frontend practices.
- Built reusable UI components and integrated REST APIs for dynamic user interaction.
- Collaborated in a team environment using GitHub for version control and project management.
- Worked on a Company–Employee Management System with focus on frontend responsiveness, clean layouts, and smooth user experience.
- Improved understanding of full-stack architecture, API integration, and real-world development workflows.

Projects:

DocuSythnAI - Tech Stack: HTML, CSS, JavaScript, Streamlit, LangChain, APIs, RAG, LLMs

- Made a responsive and interactive web interface for an AI-based legal document analysis platform.
- Having user-friendly pages for document upload, chatbot interaction, compliance tracking, and risk prediction results.
- Integrated AI-powered functionalities including document summarization, legal risk analysis, and chatbot assistance using APIs and RAG pipelines.
- Contributed to Risk Prediction and Email Integration modules while ensuring smooth frontend-backend communication, designing frontend and deployment.
- Worked with a 4-member team and won HackIndia Spark-9 Hackathon (2025).

AgroInsight - Tech Stack: HTML, CSS, JavaScript, Python, Machine Learning

- Built a robust platform that recommends suitable crops based on soil nutrients, pH levels, weather conditions, and regional parameters.
- Created attractive frontend interfaces for entering soil values such as Nitrogen, Phosphorus, Potassium, pH, humidity, and rainfall data.
- Integrated machine learning predictions to recommend crops with percentage-based matching accuracy and crop requirement insights.
- Focused on creating a clean and user-friendly interface for smooth user interaction and better accessibility.
- Improved understanding of frontend-backend integration, real-time data handling, and AI-powered recommendation systems.

CureHer - Tech Stack: HTML, CSS, JavaScript, Python, Machine Learning, APIs

- Implemented a healthcare web platform focused on women's health and PCOS/PCOD detection support.
- Crafted aesthetic frontend interfaces for uploading ultrasound images, blood reports, and clinical data with smooth user interaction.
- Built user-centric dashboards and chatbot integration for providing healthcare guidance and query support.
- Trained machine learning models for ultrasound image analysis and medical value prediction.
- Led a 3-member team and ace the University Internal Hackathon 8.0 (12-hour Hackathon).

Achievements

- Winner – HackIndia Spark-9 Hackathon (2025)
- Winner – Internal Hackathon 8.0, COER University (2025)
- 1st Runner-Up – MANTHAN National 36-Hour Hackathon (2024)
- Received Letter of Appreciation from Executive Director and Head of Department, COER University
- National Silver Medalist Athlete

Technical Highlights

- Built responsive and mobile-friendly web interfaces using React.js and Tailwind CSS
- Experience working in collaborative team environments through internships and hackathons
- Familiar with frontend optimization, REST API integration, and component-based architecture
- Passionate about modern UI design and creating smooth user experiences

Education

College Of Engineering Roorkee, B.Tech in Computer Science

July 2024 – Present

- GPA: 8.9/10
- **Coursework:** Data Structures, Operating System, Database Management System, Computer Networks, Fundamental of Data Analysis, Programming in C++ , Core Java, Python for Machine Learning

Certification and Publications

- Research Paper Presented at IEEE Conference – System for Remote Redaction and Anonymization (Text, Image, Video).
- Book Chapter Publication – Elsevier Publication: “Explainable AI in Clinical Practices”.
